The Importance of Independent Payment Integrity

The Client's TPA told the client that their agreement already included periodic claim reviews to ensure that claims are properly priced and paid.

Klaims AI discovered that the TPA's "claim reviews" and price negotiations were causing overpayments and egregious price gouging that cost the plans and members millions of dollars.

Overpayment Spotlight: Price Gouging

- A hernia repair usually costs \$1,300 in total. This Client paid \$57,159.
- \$29,419 of that went to their TPA for "negotiating a good rate".
- Klaims AI discovered, reported, and recovered the 100% TPA markup.
- **The Client will never pay that much again.**

Description of Service	Billed	Allowed	Paid
Ambulatory Surgical Center	\$146,248	\$34,526	\$28,976
TPA Negotiation Fee (25%)			\$27,930
Anesthesiologist	\$7,018	\$764	\$764
TPA Negotiation Fee (23.8%)			\$764
